Different Color

Hung-Kuo Chu

Department of Computer Science

National Tsing Hua University
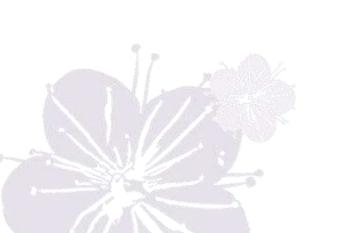

CS2410

Important

- We use Cocos Creator 2.4.8 in this course.

- Please make sure you use the same version, otherwise your program may crash when we test it.

Goal

- Fork repo *Lab09-Different Color* to your local repository

- Complete all TODOs written in **Menu.ts** and **GameManager.ts** to create an eye test game

Goal (Cont'd)

- Example Result

- DEMO URL: https://eccioa.gitlab.io/lab09-demo/
- Deadline: 2024/04/30 17:20

Grading Policy

- Clicking the start button in the **menu** scene will load the **game** scene. (10%)

- Can create the correct number of circles in **circleContainer**. (20%)

- All circles are in the correct size and position. (25%)

- Can correctly use the decided color to distinguish the only answer circle and have the correct click event for all circles. (25%)

- All audio is played correctly (both BGM and sound effect).(20%)
